insight #1:

By clicking on Comoros on the map we can see the enormous difference between the average of deaths due to malaria in Africa and Comoros. The numbers show that the average deaths in Africa is 1303 deaths per year while the average deaths in Comoros is 35 deaths per year.

insight #2:

When we look at Algeria on the map, we can see that it has very low average of malaria deaths which represent 1 death per year compared to the average of Africa with 1303 deaths per year. After observing all countries in Africa we can say it's has the lowest death rates in the continent.

Which countries are most affected?
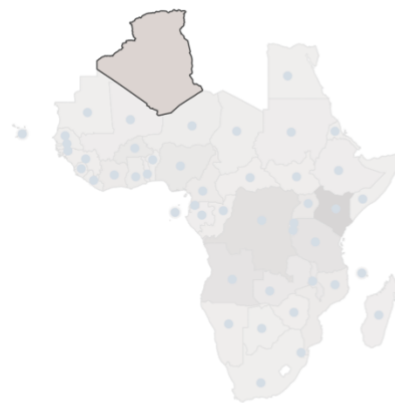

How have the number of malaria deaths changed over time in **Algeria**?

insight #3:

The graph shows the number of malaria deaths in Cote d'Ivoire between 2007-2014. In 2009 the number of deaths massively increased and exceeded the average of deaths in Africa. We can say that the number of deaths in 2009 reached 18156 deaths which is 18 times double the average deaths of Africa.

insight #4:

Pressing Kenya on the map display that the number of malaria deaths was extremely high between 2000-2010 and quickly dropped from +50k in 2011 to very low deaths as 713 per year and continued till 2014.

Which countries are most affected?

How have the number of malaria deaths changed over time in **Kenya**?
